Dear students,

The *Eduroam* (Education Roaming) wireless network has become operational at our Faculty. Access has been granted to all students (accessible from the already existing account for the student portal). Access is available at the Faculty of Medicine and all academic institutions in the country as well as in all countries - members of the *Eduroam* initiative.

The instruction manual for the wireless network can be found [here](#).

You can find more details about the *Eduroam* initiative [here](#).

Technical support regarding network use will be provided in offices 1 and 2 in the administration block (Deans office, right corridor), workdays from 8:00 until 14:00.

Snežana Brkić, M.D., Ph.D.

Dean
