

International symposium “**AI-Powered Medicine: From Discovery to Impact**”

International symposium “**AI-Powered Medicine: From Discovery to Impact,**” which will take place from **July 1 to 3, 2026**, at the Mediterranean Institute for Life Sciences (MedILS), University of Split, Croatia.

The symposium will bring together leading global experts in artificial intelligence, biomedicine, and drug discovery. The event will feature distinguished speakers from across the European Union, the United Kingdom, Canada, the United States, and the United Arab Emirates, including senior representatives from major pharmaceutical and biotechnology companies, as well as prominent academic researchers advancing next-generation AI approaches in medicine.

This event will be attended by students, young professionals, researchers, and healthcare experts from across the region to exchange knowledge, strengthen collaboration, and discuss current developments in medicine and healthcare. The ultimate goal is to foster meaningful dialogue between academia, industry, and clinical researchers on how AI is transforming medicine — from fundamental discovery to real-world clinical impact.

Participation and registration are completely free of charge for all students, while the registration fee for other attendees is €100 EUR.
