

Study program: Integrated Academic Studies in Dental Medicine
Course title: Gynecology with Obstetrics
Teacher: Tihomir R. Vejnović, Mirjana A. Bogavac, Zorica S. Grujić, Ljiljana S. Mladenović Segedi, Aljoša D. Mandić, Aleksandar B. Ćurčić, Artur L. Bjelica, Đorđe S. Petrović, Nenad B. Ćetković, Đorđe L. Ilić
Course status: elective
ECTS Credits: 3
Condition: -
<p>Course aim:</p> <p>During the theoretical classes medical students will be familiar with the course of normal pregnancy and childbirth, delivery and modern management of obstetric operations. Special attention will be paid to pathological conditions that complicate pregnancy and childbirth. Introduction to etiopathogenesis, clinical presentation, diagnostic procedures, the basic principles of therapeutic and prevention of diseases of female genital organs (inflammatory disease, benign and malignant tumors), as well as modern methods of family planning, contraception, diagnosis and treatment of marital sterility. During the practical part of teaching (ie. student exercises) medical students acquire and obtain basic practical knowledge in the field of obstetrics and gynecology, obstetrics and gynecology ultrasound examination as well as the most frequently performed interventions.</p>
<p>Expected outcome of the course</p> <p>After completion of the two-semester program, students should know how to diagnose a normal pregnancy, recognize pathological pregnancy, perform basic gynecological examination under a speculum, take cytological smear and perform bimanual gynecological examination. Also, after completion of the two-semester program, students should pass exam in obstetrics and gynecology. Exam consists of a written test, a practical and oral part of the exam.</p>
<p>Course description</p> <p><i>Theoretical education</i></p> <p>Obstetrics</p> <ul style="list-style-type: none"> - Prenatal and antenatal care of pregnant women - Physiology of pregnancy and normal placentation - Management of normal labor and delivery - Mechanisms of labor in the vertex presentation and breech presentations and delivery - Cesarean section and operative vaginal deliveries - High risk pregnancies (Rh isoimmunization and ABO incompatibility, diabetes in pregnancy, intrauterine growth restriction, hypertensive syndrome in pregnancy, preterm delivery) - Anemia in pregnancy - Multiple gestations - Post-term pregnancy and induction of labor - Prenatal diagnostics and ultrasound in obstetrics <p>Gynecology</p> <ul style="list-style-type: none"> - Anomalies of female reproductive system - Pelvic inflammatory diseases in gynecology - Gynecological urology (stress and urge urinary incontinence, low urinary tract symptoms) - Benign and malignant tumors of female genital organs - Pathology of genital organs in juvenile and adolescent age - Marital infertility - Assist. reproductive techniques - Family planning <p><i>Practical education:</i></p> <ul style="list-style-type: none"> - Obstetric and gynecologic history - Examination of pregnant women (external and internal) - Gynecologic physical examination (general, speculum and bimanual examination)
